

1. What types of TV screen technologies are currently available in Australia, and which are the most common?

Required data: The total number of users for each screen technology.

Suitable chart: Pie chart.

Reason: The pie chart is suitable for representing the share of different categories and can clearly illustrate the market distribution of various TV screen technologies.

2. What is the relationship between screen size and power consumption?

Required data: Screen size and power consumption.

Suitable chart: Scatter plot.

Reason: Scatter plots are effective for displaying the relationship between two variables (screen size and power consumption) and can reveal trends, such as whether larger screen sizes correlate with higher power consumption.
